

Information Security Leadership Charter

Document date: 2025-11-15 · Maps to NIST CSF GV.RR

1. Role

The Director of Information Security leads the security program and is the designated HIPAA Security Official.

2. Responsibilities

Maintain the security program, oversee risk assessments, manage security operations, coordinate incident response, and report security posture to leadership.

3. Reporting

The Director currently reports through the IT organization. A formal charter defining independent authorities, decision rights, and a ring-fenced security budget has not yet been ratified.

Sample document generated for CyberRx pilot testing. Fictional organization; not real PHI. This document intentionally omits some required elements so reviewers can verify gap detection.
